TITLE : MULTIPURPOSE HALL

ABSTRACT : PURPOSE: To vary the content volume of a hall, by a method wherein a number of panel units are located at floor, wall and ceiling parts, and moving means, by each of which the panel unit can be extended or retracted, are provided for all or part of these panel units.

CONSTITUTION: A ceiling part is composed of a number of panel units 10, in which proscenium speakers 50, ceiling spotlights 51 and projectors 52 are stored, and each of which has a moving means consisting of hydraulic jacks, etc. A wall part is composed of a number of panel units 20, which have at least one door 56 and each of which has the moving means. A floor part is composed of a number of panel units 30, each of which has the moving means. When a hall is set up for the use of a large-scale theater or lecture, the panel units 10 each are shifted to positions where each of these apparatus fulfills its function sufficiently, the panel units 20 for the wall part are shifted so as to form the number of seats corresponding to a seating capacity, and the panel units 30 for the floor part are shifted so as to form stepped floors. When the hall is set up for the use of a concert, the panel units 10, 20 are shifted and are formed in uneven shape.
